

Safety & Legal Checklist

Drone Roof Photo Inspection

Pre-flight checklist covering local drone rules, permission, airspace, weather, privacy, insurance, hazards, and visual-only scope boundaries.

BUYER	CATEGORY	FIRST SALE	DIFFICULTY
Roofers, agents, solar installers, and homeowners	Local Service	2-4 weeks	Medium

BEFORE SENDING

Replace placeholders, verify facts, keep approvals in writing, and avoid guaranteed revenue, ranking, retention, booking, or ad-performance claims.

Safety & Legal Checklist

Client worksheet: use this page while turning the asset into a buyer-ready deliverable.

Area	Decision	Owner	Done?
Buyer context	Specific business, segment, and visible pain	You	
Source proof	Screenshots, URLs, reviews, data, or examples saved	You	
Approval risk	Claims, prices, hours, legal-sensitive facts checked	Client	
Delivery	Working file, final export, and next step included	You	
Follow-up	Renewal angle or paid next step identified	You	

Rule: if a buyer could misunderstand the recommendation, rewrite it as a clear operational next step.

Handoff: summarize what changed, what needs approval, and what you recommend doing next.

- 04 Quality bar
- 05 Delivery note
- 06 Pre-flight decision gate
- 07 Shot list
- 08 Report boundary check
- 09 Commercial readiness standard
- 10 Delivery standards (shared)

Pack Snapshot

- Buyer: Roofers, agents, solar installers, and homeowners
- Category: Local Service
- Startup cost: \$251-\$1k
- Time to first sale: 2-4 weeks
- Difficulty: Medium
- Positioning hook: Clear roof photos and a simple visual report without anyone climbing a ladder.

Asset objective

- Roofs are high-stakes and hard to inspect from the ground. When a buyer sees clear overhead photos, the value is immediate without you claiming to certify structural condition.
- Keep the promise concrete: This is visual photo documentation, not a structural, engineering, safety, insurance, or building inspection.
- Use this asset to create a buyer-ready deliverable, not as a generic brainstorming note.

Core checklist

- Confirm local drone rules, registration/licensing requirements, airspace restrictions, and any permission or notification requirements before accepting paid work.
- Get property-owner or authorised-agent permission in writing before flying and avoid capturing neighbouring private areas where possible.
- Check weather, wind, visibility, battery level, return-to-home settings,

obstacles, trees, power lines, birds, people, traffic, and safe launch/landing area.

- Carry or confirm suitable drone liability insurance for paid work before offering commercial reports.
- Label the service as visual photo documentation only; do not certify structural condition, safety, insurance coverage, code compliance, or repair urgency.

Quality bar

- The asset should be specific enough that a buyer can approve it without a meeting.
- Every recommendation must be visible, actionable, and easy to explain.
- Remove anything that sounds impressive but does not change buyer behavior.

Delivery note

- Send the finished asset with a short summary of what changed.
- Include the next recommended step, the owner input needed, and the review deadline.
- Keep a copy of before/after evidence for renewals and follow-ups.

Pre-flight decision gate

- Do not fly if local rules, airspace status, owner permission, weather, visibility, battery condition, or launch area are unclear.
- Do not fly over people, traffic, neighbouring private areas, animals, power lines, or unsafe obstacles.
- Reschedule if wind, rain, glare, shadow, or visibility would make the photo set misleading or unsafe.
- Document any limitation in the report: tree cover, shadows, steep pitch, obstruction, access, privacy boundary, or weather.

Shot list

- Wide context photo of the property and roof orientation.
- Front, rear, left, and right roof planes where visible and permitted.
- Gutters, valleys, ridges, flashing, vents, chimneys, skylights, penetrations, and solar panels if present.
- Any client-requested area of interest, captured from multiple safe angles where possible.
- Short video flyover for orientation only, not diagnosis.

Report boundary check

- Say visible area of interest, not confirmed defect.
- Say qualified professional review may be useful, not repair required.
- Say visual photo documentation, not inspection certificate.
- Avoid hidden damage, waterproofing, electrical, structural, safety, or insurance conclusions.

Commercial readiness standard

- Treat permission, airspace, weather, privacy, and insurance as go/no-go items, not admin details.
- Document who authorised the flight before arrival.
- Keep a simple log of flight date, property, weather, limitations, and report delivery.
- If a paid job requires rules you cannot confidently comply with, decline or refer it out.

Delivery standards (shared)

- This asset is for roofers, agents, solar installers, and homeowners; replace bracketed fields with their specifics before sending.
- Full delivery standards - inputs to collect, evidence capture, pricing and scope guardrails, and the pre-send QA list - live once in this pack's AI Prompt Pack.
- Verify every fact, price, date, hour, link, and claim against a source, and keep approvals in writing.
- Never imply guaranteed revenue, rankings, bookings, retention, or ad performance.
