

Restoration Safety Checklist

Mobile Headlight Restoration

Pre-job checklist for lens condition, masking, sanding grit sequence, UV sealant, PPE, weather, paint protection, and result boundaries.

BUYER	CATEGORY	FIRST SALE	DIFFICULTY
Car owners, used-car sellers, landlords with fleets, and local dealers	Local Service	1-7 days	Easy

BEFORE SENDING

Replace placeholders, verify facts, keep approvals in writing, and avoid guaranteed revenue, ranking, retention, booking, or ad-performance claims.

Restoration Safety Checklist

Client worksheet: use this page while turning the asset into a buyer-ready deliverable.

Area	Decision	Owner	Done?
Buyer context	Specific business, segment, and visible pain	You	
Source proof	Screenshots, URLs, reviews, data, or examples saved	You	
Approval risk	Claims, prices, hours, legal-sensitive facts checked	Client	
Delivery	Working file, final export, and next step included	You	
Follow-up	Renewal angle or paid next step identified	You	

Rule: if a buyer could misunderstand the recommendation, rewrite it as a clear operational next step.

Handoff: summarize what changed, what needs approval, and what you recommend doing next.

Restoration Safety Checklist

Mobile Headlight Restoration

Pre-job checklist for lens condition, masking, sanding grit sequence, UV sealant, PPE, weather, paint protection

Inside this document

- 01 Pack Snapshot
- 02 Asset objective
- 03 Core checklist
- 04 Quality bar
- 05 Delivery note
- 06 Delivery standards (shared)

Pack Snapshot

- Buyer: Car owners, used-car sellers, landlords with fleets, and local dealers
- Category: Local Service
- Startup cost: \$51-\$150
- Time to first sale: 1-7 days
- Difficulty: Easy
- Positioning hook: Cloudy headlights are a small fix with obvious before-and-after proof.

Asset objective

- The problem is visible in daylight, the result is easy to show, and many owners want the car to look cleaner before selling, inspecting, or driving at night.
- Keep the promise concrete: Do not promise like-new results, roadworthiness, legal compliance, or permanent restoration. Some lenses need replacement.
- Use this asset to create a buyer-ready deliverable, not as a generic brainstorming note.

Core checklist

- Confirm the lens is plastic and restorable; reject cracked lenses, heavy internal moisture, severe crazing, broken tabs, or lights that clearly need replacement.
- Clean the lens, mask surrounding paint and trim, protect nearby panels, and keep sanding water and compound away from unprotected surfaces.
- Use the planned grit sequence, polish carefully, apply UV sealant or coating, and follow the product cure instructions before handing off.
- Wear eye protection, gloves, and a dust mask where needed; avoid windy, rainy, extreme-heat, or poor-light jobs that make quality control harder.
- Take before/after photos from the same angle and explain that restoration improves appearance and clarity but is not a roadworthy certificate or permanent fix.

Quality bar

- The asset should be specific enough that a buyer can approve it without a meeting.
- Every recommendation must be visible, actionable, and easy to explain.
- Remove anything that sounds impressive but does not change buyer behavior.

Delivery note

- Send the finished asset with a short summary of what changed.
- Include the next recommended step, the owner input needed, and the review deadline.
- Keep a copy of before/after evidence for renewals and follow-ups.

Delivery standards (shared)

- This asset is for car owners, used-car sellers, landlords with fleets, and local dealers; replace bracketed fields with their specifics before sending.
- Full delivery standards - inputs to collect, evidence capture, pricing and scope guardrails, and the pre-send QA list - live once in this pack's AI Prompt Pack.
- Verify every fact, price, date, hour, link, and claim against a source, and keep approvals in writing.
- Never imply guaranteed revenue, rankings, bookings, retention, or ad performance.
