

Inbox Workflow Map

AI Inbox Triage for Trades

A simple lead triage workflow diagram.

BUYER	CATEGORY	FIRST SALE	DIFFICULTY
Trades businesses	AI Tool	2-4 weeks	Medium

BEFORE SENDING

Replace placeholders, verify facts, keep approvals in writing, and avoid guaranteed revenue, ranking, retention, booking, or ad-performance claims.

Inbox Workflow Map

Route every inbound message through this approval-first flow.

Rule: AI may draft, but urgent/safety issues and all outbound messages require human approval.

Inbox Workflow Map

AI Inbox Triage for Trades

A simple lead triage workflow diagram.

Inside this document

- 01 Pack Snapshot
- 02 Asset objective
- 03 Core checklist
- 04 Quality bar
- 05 Delivery note
- 06 Workflow map
- 07 Triage rule examples
- 08 Delivery standards (shared)

Pack Snapshot

- Buyer: Trades businesses
- Category: AI Tool
- Startup cost: \$1-\$50
- Time to first sale: 2-4 weeks
- Difficulty: Medium
- Positioning hook: Plumbers do not need an AI agent. They need inbox triage.

Asset objective

- Trades businesses lose leads when messages sit unanswered or arrive without clear job details.
- Keep the promise concrete: Keep human approval in the loop.
- Use this asset to create a buyer-ready deliverable, not as a generic brainstorming note.

Core checklist

- Label inquiry type: emergency, quote, follow-up, complaint, supplier, admin.
- Extract minimum job details: location, issue, urgency, access, photos, preferred time.
- Draft reply only after classification and missing-info check.
- Route urgent jobs to phone-first workflow.
- Keep human approval before any message is sent.

Quality bar

- The asset should be specific enough that a buyer can approve it without a meeting.
- Every recommendation must be visible, actionable, and easy to explain.
- Remove anything that sounds impressive but does not change buyer behavior.

Delivery note

- Send the finished asset with a short summary of what changed.
- Include the next recommended step, the owner input needed, and the review deadline.
- Keep a copy of before/after evidence for renewals and follow-ups.

Workflow map

- Inbound message -> classify type -> check missing details -> urgency route.
- Emergency -> phone-first instruction -> human dispatch decision.
- Quote -> gather suburb/photos/access/timing -> draft reply -> human approval.
- Complaint -> acknowledge -> escalate internally -> approved response only.
- Admin/supplier -> non-lead label -> route away from quote queue.

Triage rule examples

- Emergency: gas smell, active leak, electrical hazard, lockout, or no essential service.
- Quote: non-urgent job with photos, suburb, access, timing, and scope.
- Missing info: request details before booking or quoting.
- Complaint: acknowledge, do not debate, escalate to owner before reply.

Delivery standards (shared)

- This asset is for trades businesses; replace bracketed fields with their specifics before sending.
- Full delivery standards - inputs to collect, evidence capture, pricing and scope guardrails, and the pre-send QA list - live once in this pack's AI Prompt Pack.
- Verify every fact, price, date, hour, link, and claim against a source, and keep approvals in writing.
- Never imply guaranteed revenue, rankings, bookings, retention, or ad performance.
