

Hook Bank

UGC Brief Generator

Reusable short-form ad hook patterns.

--	--	--

Before sending

Replace placeholders, verify facts, keep approvals in writing, and avoid guaranteed revenue, ranking, retention, booking, or ad-performance claims.

Hook Bank

Client worksheet: use this page while turning the asset into a buyer-ready deliverable.

Area	Decision	Owner	Done?
Buyer context	Specific business, segment, and visible pain	You	
Source proof	Screenshots, URLs, reviews, data, or examples saved	You	
Approval risk	Claims, prices, hours, legal-sensitive facts checked	Client	
Delivery	Working file, final export, and next step included	You	
Follow-up	Renewal angle or paid next step identified	You	

Rule: if a buyer could misunderstand the recommendation, rewrite it as a clear operational next step.

Handoff: summarize what changed, what needs approval, and what you recommend doing next.

Hook Bank

UGC Brief Generator

Reusable short-form ad hook patterns.

Pack Snapshot

- Buyer: Ecommerce brands
- Category: Creator Business
- Startup cost: \$0
- Time to first sale: 1-7 days
- Difficulty: Easy
- Positioning hook: Brands do not need more creators. They need better briefs.

Asset objective

- Short-form ad production breaks down when brands give creators vague instructions.
- Keep the promise concrete: The brief must be specific enough to improve output.
- Use this asset to create a buyer-ready deliverable, not as a generic brainstorming note.

Core checklist

- Problem-aware hook: name the exact frustration the buyer already feels.
- Before/after hook: show the product state change in one sentence.
- Myth hook: challenge a lazy assumption in the category.
- Proof hook: lead with a result, review phrase, or repeated customer behavior.
- Demo hook: show the product in use before explaining anything.

Quality bar

- The asset should be specific enough that a buyer can approve it without a meeting.
- Every recommendation must be visible, actionable, and easy to explain.
- Remove anything that sounds impressive but does not change buyer behavior.

Delivery note

- Send the finished asset with a short summary of what changed.
- Include the next recommended step, the owner input needed, and the review deadline.
- Keep a copy of before/after evidence for renewals and follow-ups.

Ready-to-use hooks

- I bought this for [problem], but the useful part was [unexpected benefit].
- Three things I wish I knew before trying [product].
- If [common frustration] annoys you, watch this part.
- This is not for everyone, but it is useful if [specific buyer].
- I tested [old way] against [product], and here is the difference.
- The feature that looks boring is actually the reason I kept using it.
- Before you buy [category], check this one detail.

- I would skip this if [bad-fit buyer], but use it if [good-fit buyer].

Hook selection rules

- Choose problem-aware hooks for cold audiences.
- Choose proof hooks when the brand has specific reviews or strong product evidence.
- Choose demo hooks when the product is visually obvious within three seconds.
- Reject hooks that could apply to any product in the category.

Buyer-ready deliverable standard

- This asset is for ecommerce brands; remove generic language before sending it to a prospect or client.
- The finished version should name the buyer context, the visible problem, the exact output, and the next decision required.
- Use concrete operational language. Replace broad promises with observable improvements: clearer menu, faster reply, cleaner handoff, fewer repeat questions, better approval trail.
- Keep one owner-facing summary at the top and one implementation checklist at the end so the buyer can act without a second explanation.

Inputs to collect before delivery

- Business name, owner or approver, preferred contact channel, and deadline.
- Current source material: screenshots, URLs, exports, menus, customer messages, reviews, product pages, or public market data depending on the pack.
- Brand constraints: logo, tone, colors, prohibited claims, legal-sensitive statements, and examples they already like.
- Approval constraints: who signs off, what can be changed without approval, and what must stay untouched.
- Delivery format: editable working file, final PDF/export, implementation checklist, and optional follow-up message.

Evidence capture for renewal or case study

- Save the before state with dated screenshots or source files.
- Record the exact changes made and why they were prioritized.
- Track buyer response time, approval friction, and implementation date.
- Ask for permission before using any quote, logo, review, screenshot, market data, or client result in a portfolio.
- If the buyer does not approve public proof, keep an anonymized internal case note for improving future pitches.

Client handoff message

- Here is the finished hook bank for [business]. I included the working file, final export, and the short checklist for approval.
- The items marked [APPROVAL NEEDED] are the only parts I would not publish/send until you confirm them.
- My recommended next step is [specific next action]. If you want me to handle that as

well, I can package it as [starter/standard/retainer option].

Pricing and scope guardrails

- Starter scope: one focused deliverable, one input list, one approval round, final export.
- Standard scope: deeper audit, 2-3 deliverables, implementation notes, and two approval rounds.
- Retainer scope: recurring refresh, monthly report, or ongoing response/review workflow with a fixed cadence.
- Out of scope unless priced separately: photography, ad spend, legal review, complex integrations, custom software, printing, and guaranteed performance outcomes.

Final QA before sending

- All bracketed placeholders are replaced or intentionally marked for buyer approval.
- Every link, date, price, hour, policy, claim, and contact detail is checked against a source.
- The final file opens on another machine and the filename clearly identifies the buyer, asset, and date.
- The buyer can tell what to do next within the first 30 seconds of opening the asset.
- No income, ranking, revenue, health, legal, or advertising performance guarantee is implied.
